**Hybrid Highlights and Placement Recommendations**

- Medium plant height
- Medium ear height
- Works well across a wide variety of soil types
- Very good grain quality
- Very good ear flex
- Silage potential

Product performance in water-limited environments is variable and depends on many factors such as the severity and timing of moisture deficiency, heat stress, soil type, management practices and environmental stress as well as disease and pest pressures. All hybrids may exhibit reduced yield under water and heat stress. Individual results may vary.
